

Tips & Tricks for the Perfect Tea Tan Glow!

- **Avoid deodorant or essential oils** during application. These products can interfere with the bronzer and may affect your desired results.
- **Exfoliate before you apply!** Removing dead skin cells will help prevent splotching and uneven coloration. We, of course, recommend Beautisol's Deep Exfoliating Hammam Mitt.
- If needed, apply a small amount of body lotion to dry areas such as the knees, elbows and heels. Body lotion helps to ensure a more even tan in these areas.
- **Use Beautisol's Application Mitt** or wash your hands after applying Tea Tan Glow to your body. This will avoid discoloration of your palms.
- **Stay away from water or sweating** while wearing the product as this will remove the tan color from your skin and may cause splotchiness.
- **Avoid wearing white** or light-colored suede, silk or any other dry-clean-only fabrics.
- **Reapply** a second coat of product a few minutes later if you desire a darker looking tan color on your skin.
- When you shower, your Tea Tan Glow will easily be removed with soap and water.
